Professional Experience

Acra Lending May 2026 – present
Senior Decision Scientist *Irvine, CA*

- Developed a loan-level pull-through model for the Wholesale and Correspondent pipeline supporting $500MM in monthly fundings, using credit, pipeline status, time-in-status, and rate-movement factors to estimate funding probability and timing, benchmark expected vs. actual fundings, and flag at-risk loans daily
- Built a Python analytics platform measuring prepayment and credit performance (CPR/CRR/CDR, delinquency, loss) across a $14B servicing portfolio, up from $9.3B at the start of 2025, with cohort analysis by vintage, channel, occupancy, documentation, prepayment penalty, and deal, reconciled to dv01 and servicer remittance data
- Built a scenario-based funding and inventory forecast for Capital Markets that converts loan-level pull-through probabilities into projected daily fundings and forecasts WAC progression under pipeline, new-submission, trade-size, and sell-lag assumptions
- Corrected MSR prepayment reporting by reconciling servicing populations with Accounting and identifying $271MM of servicing transfers and MSR sales incorrectly captured as payoffs, removing the distortion from retained-portfolio prepayment speeds
- Migrated loan-level analytical pipelines from SQL Server to Snowflake, building source-system crosswalks and loan-level parity tests to resolve field-definition, population, and data-quality differences with the data team

SG Capital Partners August 2022 – March 2026
Capital Markets Associate *Stamford, CT (Remote)*

- Directed AI adoption strategy by overseeing workspace initiatives, showcasing generative AI applications, and leading firmwide engagement sessions
- Led 1-on-1 strategic sessions with the CEO to develop and refine AI initiatives for senior leadership review and adoption
- Constructed cashflow models for RMBS and whole loan pools in Python using object-oriented programming and recursive algorithms
- Served as capital markets liaison for correspondent channel funding $500M/month, advising on product eligibility and market color
- Authored monthly Home Price Appreciation report distributed to 1,000+ industry recipients, synthesizing six data sources with automated data pulls and client-facing visuals via Mailchimp
- Built portfolio surveillance tracking prepayments, delinquencies, and loss severity across $5B+ in managed assets. Cut single-account reporting from two days to 30 minutes, then scaled firm-wide via RiskSpan, reconciling against servicer remittance data

Impac Mortgage Corp. September 2020 – August 2022
Capital Markets Analyst *Irvine, CA*

- Developed competitive pricing analysis reports with Python web-scraping methods
- Modernized and automated tasks by converting into scripts supported with version control
- Assessed pipeline health and presented visualizations with Power BI
- Optimized data acquisition for internal reporting using T-SQL

Internships

USC Football May 2019 – July 2020
Player Personnel Intern & Analytics Specialist *Los Angeles, CA*

USC Sports Information Office August 2016 – May 2020
Student Intern *Los Angeles, CA*

LenderLive Network June 2018 – August 2018
Capital Markets Intern *Aliso Viejo, CA*

Oliver Wyman June 2017 – August 2017
Actuarial Consulting Intern *Los Angeles, CA*

Education

University of Southern California *Los Angeles, CA*
Master of Science in Financial Engineering May 2020
Bachelor of Science in Mechanical Engineering, Minor in Sports Media Studies May 2019

Projects

Organized and Optimized my 10,000+ Baseball Card Collection | *Python, R, ggplot2, MySQL, Excel* 2021 – present
Built Python script to scrape flight data from Kayak and export results to Excel | *Python, Selenium, XlsxWriter* 2024
Parsed sheet music to track rhythm pacing for *The Star-Spangled Banner* | *Python, Claude Code, Flask, JavaScript* 2024
Built customizable baseball scorecard in LaTeX for game scoring | *LaTeX, TikZ* 2023
Automated draft prep with a script that scrapes and merges fantasy football data | *Python, BeautifulSoup, XlsxWriter* 2021

Skills

Technical: Data Analysis, Credit Risk Modeling, Statistical Modeling, Forecasting, Data Visualization, Version Control, AI Integration
Software: Python, R, SQL, Snowflake, SQL Server Management Studio, Microsoft Excel, Microsoft PowerPoint, LaTeX, Git, GitHub, Bitbucket, Jira, Confluence, C++, MATLAB
AI Tools: Claude Code, Codex, OpenAI API, Claude, ChatGPT, Gemini
